Visakhapatnam, AP · Open to relocation · Immediate joiner

SUMMARY

CSE graduate (CGPA 9.06) who builds full-stack web apps with Node.js, Express and SQL. Designed a 12-table booking schema with a database-level double-booking guard and session-based auth with role-based access. Two internships, including one on an AI-powered iOS app live on the App Store.

EDUCATION

B.Tech, Computer Science & Engineering, KL University (KLEF), Vijayawada · CGPA 9.06 / 10 — 2022 – 2026

Intermediate (MPC), Narayana Junior College, Visakhapatnam · 74.4% — 2020 – 2022

SSC, Vijayam Techno School, Visakhapatnam · 99% — 2020

EXPERIENCE

Software Development Intern, NSK Software Solutions — 2025 – Present

UpLift Me: AI-powered goal-tracking iOS app on the Apple App Store (SwiftUI client, AWS backend)

- Completed a three-month onboarding on the product's problem statement, user flows and architecture.
- Contributed small fixes and features with the core team using AI-assisted development; reviewed every change before merge.
- Took part in QA and App Store submission sessions for production releases.

AI/ML Intern, APSSDC & Edunet Foundation — May 2024 – Jun 2024

- Built and evaluated classification models in a team of four; handled data cleaning, feature engineering and normalisation.
- Used Git for version control and took part in daily technical stand-ups.

PROJECTS

BusGo: Bus Ticket Booking System — github.com/phanikumar1619/bus-ticket-booking

- Built route search, an interactive seat map, a 4-step checkout, e-tickets, cancellations and an admin panel for buses, schedules and bookings.
- Structured the Express API in layers (routes → controllers → services) over a normalised 12-table SQLite schema.
- Prevented double-booking with a transaction plus a partial unique index allowing one active booking per seat, bus and date (HTTP 409 on conflict).
- Implemented scrypt password hashing, SHA-256-hashed session tokens and role-based access control.

Node.js · Express 5 · node:sqlite · SQL · ES modules · HTML, CSS, JavaScript

BlogSpace: Blogging Application — github.com/phanikumar1619/blogspace-application-blogging-app-

- REST API with full CRUD and Multer image uploads validated by file signature and size; client and server validation; handled loading, empty, error and offline states.

Node.js · Express 5 · better-sqlite3 · Multer · JavaScript

People CRUD API & Node.js Fundamentals — github.com/phanikumar1619

- Express REST API (GET/POST/PUT/DELETE) with body-parsing middleware, consistent JSON responses and correct 200/201/400/404 status codes, plus a dashboard that shows live responses.
- 30+ scripts on Node.js core: modules, fs (sync, callbacks, promises), path, os, a raw http server rebuilt in Express, route params and query filtering.

Node.js · Express 5 · JavaScript · npm · nodemon

TECHNICAL SKILLS

Languages	JavaScript (ES6+), SQL, HTML5, CSS3
Backend	Node.js, Express.js, REST API design, middleware, layered architecture, async/await
Node.js core	fs and fs/promises, path, os, http, CommonJS and ES modules
Databases	SQLite (node:sqlite, better-sqlite3), schema design, transactions, indexes and constraints
Security	scrypt password hashing, session auth, role-based access, input and upload validation
Frontend & tools	DOM, Fetch API, Git, GitHub, npm, nodemon, Multer, REST Client

CERTIFICATIONS

Aviatrix Certified Engineer – Multicloud Network Associate (2025) · Salesforce Certified AI Associate (2024) · Oracle Cloud Foundations Associate · Automation Anywhere RPA Essentials · NPTEL Programming in Java, IIT Kharagpur (2023)
